

CONFINED SPACE ENTRY EQUIPMENT

A Division of Gasonic Instruments Inc.

EnviroRentals offers a suite of instruments and equipment that are vital for working safely in confined spaces. Our selection includes brand name products for fall protection, retrieval, ventilation, respiratory protection and gas detection. Rent the complete package or only the pieces you need.

Retrieval Kits

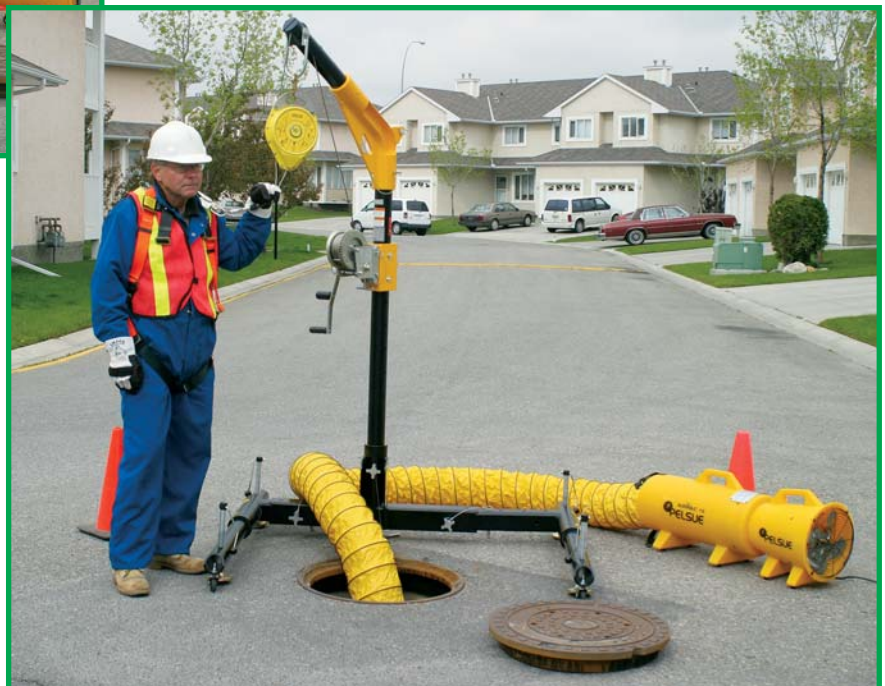

(Left) - *PELSUE P700 Industrial Tripod*
(Product #7020) and Retrieval Kit (Product # 7021)

The P700 is a portable, lightweight, high-strength anchor. The locking legs can be adjusted to set the tripod at heights from 4-7'. Available with 30' self-retracting lifeline, cable, pulley, steel carabiner and man rated winch with 50' stainless steel cable.

(Below) - *PELSUE PNUH 505C Davit Arm System*
(Product # 7022) and Retrieval Kit (Product #7023)

This unit allows for simpler access and egress. Cast aluminum components can be moved and assembled quickly. Elbow units are reversible to allow for setting to different offset reaches. The davit is man rated to 350 lb. Davit arm system includes centre post, davit mast, and base. Available with 30' self-retracting lifeline and man-rated winch with 50' stainless steel cable.

(Both Photos) Fall Protection Kit

NORGUARD Fall Protection Kit
(Product # 7010)

Kit includes:

- NH-28 full-body harness, universal size
- Steel autolocking carabiner
- 4' nylon web shock-absorbing lanyard
- Rope grab for polysteel rope
- 50' polysteel lifeline
- 3' web anchor sling
- Rope bag

Ventilation Equipment

PELSUE Axial Ventilator and Canister/Hose System (Product # 7030)

Ideal for most confined space entries, axial ventilators are portable, light, and capable of delivering high volumes of air. The Pelsue 1325P Axial Ventilator has a 1/3 HP electric motor and weighs only 17 lb. The Airpac 15 Hose Canister attaches to the ventilator and includes 15 feet of flexible duct hose.

Respiratory Protection

NEOTERIK Supplied Air System (Product # 7040)

This positive-pressure supplied air system includes fresh air pump, a 4-user SP air purification panel (20 cfm), four (4) full-face mask airline respirators and 4 x 50-foot airline hoses. This system is used with an in-plant air supply or an additional air compressor (available locally).

Gas Detection

NEOTRONICS Impact Pro (Product # 1311)

The Impact Pro is a rugged, accurate instrument for continuous monitoring of oxygen (O₂), combustible gases (LEL), carbon monoxide (CO), and hydrogen sulphide (H₂S). All four readings are displayed simultaneously and a variety of alarms keeps the user informed. The Safelink feature allows ongoing communication between the confined space worker and the attendant at the point of entry.

RKI GX2001 (Product # 1320)

The GX2001 is one of the smallest four-gas monitors available. At 140 grams and the size of a pager, the unit is packed with many of the features that you would expect on any gas monitor. Simultaneously measures O₂, CO, H₂S and combustible gases (LEL). The instrument has audible, visual and vibrating alarms to notify the user of hazardous conditions.
