

The **GAST High Volume Air Sampling Pump** allows for operation at much higher flowrates than achievable with “personal”-type pumps. A large volume of air can therefore be sampled in a relatively short time period. Requires AC power source.

Features:

- User-adjustable flowrates from 1-20 LPM
- Easy to install and operate
- Compact

Typical Applications

- High-volume sampling of asbestos or other airborne fibres
- Other high volume sampling

Accessories:

- Standard:** - calibration rotameter
- tripod

Specifications:

| | |
|----------------|---|
| Flowrate Range | : 1-20 litres/minute |
| Power | : 110-115V AC |
| Weight | : 4.5 kg (10 lb.) |
| Dimensions | : 26cm x 17cm x 9.5cm (10” x 17” x 4”) |
