

SOLINST

Model 101 Water Level Meter

Prod # 5050/5052

The **SOLINST Model 101 Water Level Meter** is easy to operate and read to 1/100 ft or to each millimetre. It is powered by a standard 9-volt battery.

When the probe contacts water a loud buzzer and light are activated. The water level is then read from the tape at the top of the well casing or borehole.

Specifications:

Range : Measure water levels to 150m (500 ft.)

Intervals: Markings each 1 mm or 1/100 ft.

Power : 9-volt battery

Features:

- Traceable to national standards
- Sensitivity adjustable to conductivity
- Non-stretch stainless steel conductors
- Rugged, corrosion-proof components

Typical Applications:

Measure depth of water in:

- Wells
- Boreholes
- Standpipes
