

The **Redi-Flo2** variable pump combines state-of-the-art technology for a light, compact and yet powerful, submersible pump for precise, accurate, and reproducible groundwater sampling.

Specifications:

Flow rates : 100 ml/min to 9 gallons per min (gpm)

Depth : 300 ft

Pump:

Dimensions : 28.0 cm x 4.5 cm diameter

: (11.0" x 1.8" in diameter)

Weight : 5.5 lbs

Features:

- Flow rates from 100 ml/min to 9 gallons per min
- Compact design and power
- Indicators for low-voltage, over-voltage and current: power supply/function loss
- Continuous flow
- 2 inches in diameter, to fit the smallest wells
- Made of chemically-inert materials

Applications:

- Groundwater sampling
- Aquifer tests
- Groundwater purging

Accessories:

- Power converter
