

The **APC1000** precisely measures the quantity of airborne particles ranging in size from 0.3, 0.5 and 1.0 to 5.0  $\mu\text{m}$  at 0.1 cfm rate of flow. The APC-1000 records this data, as well as temperature and relative humidity readings. The instrument can be programmed to store data from 200 seconds to 66 days.

### *Features:*

- Compact size and light-weight
- Simultaneous measurements of four sizes of particles
- Serial interface for printout of stored data
- Freely selectable measurement time

### *Applications:*

- Indoor air quality assessments
- Industrial hygiene
- Clean-room diagnostics and trouble-shooting
